Portfolio: JabbyAlicante.github.io

SUMMARY

Computer Science fresh graduate, enthusiastic about software and web development. Experienced in both frontend and backend development, including database management and API integration. Seeking to leverage technical skills, collaborate, and create innovative solutions while exploring new technologies and continuing professional growth.

TECHNICAL SKILLS

Programming languages: JavaScript, Python, C++ ,PHP

Frontend development: Vanilla JS, HTML, CSS, Single Page Application (SPA) , Flutterflow

Technologies & Tools: Github, Docker, Virtual Machine, XAMPP, The Sandbox , Roboflow

AI Tools: ChatGPT, Copilot , Cursor, Claude

Backend development: Node.js, REST API,Express.js, Fast API

Database development: MySQL, Supabase, Mongo DB, SQLITE

Wireframing: Balsamiq

UI Editing: Figma

Photo/Logo Editing: Canva, GIMP

PROFESSIONAL EXPERIENCE

Project Dev start “Kamada“

April 2025- May 2025

Software Developer Intern Project

JCAS LOGISTICS - Malolos, Bulacan

Tech Stack: Balsamiq, Flutterflow, Supabase

- Contributed to the development of an HR module and Driver's Companion App to streamline internal operations, focusing on UI/UX design, frontend implementation and backend logics, improving overall user experience and navigation efficiency.
- Designed wireframes and user interfaces using Balsamiq and FlutterFlow, enhancing usability and reducing user interaction complexity.
- Integrated frontend components with Supabase for real-time data handling and database structuring, enabling efficient data synchronization and faster application performance.

RELEVANT EXPERIENCE

Handigo - Software-Based gesture Control Recognition Software

July 2025 - Feb 2026

College Thesis Project

Tech Stack: Roboflow, Python, Javascript, HTML, CSS, Rust

- Designed and developed the UX and UI for Handigo Website and App
- Collected, annotated, and processed image datasets using Roboflow
- Developed backend command processing, integrated perspective-based gesture recognition, and implemented search features for efficient data retrieval

The Tector - NLP-Based Text processing (Spam, FakeNews, SpeechHate)

Dec 2025 - Jan 2026

College Project

Tech Stack: Python, Javascript, HTML, CSS

- Designed and developed the UX and UI for The Tector Website
- Collected, normalized, and preprocessed text data for spam detection
- Constructed n-gram (unigram, bigram, trigram) language models
- Developed a spam classifier using interpolated n-gram probabilities with smoothing techniques
- Implemented real-time integration with Discord and Telegram bots for automated spam filtering

The Unknown - Search Engine for Unsolved Cases

Sept 2025 - Oct 2025

College Project

Tech Stack: Python, Javascript, HTML, CSS, MongoDB, Docker

- Designed and implemented backend preprocessing pipeline for search engine
- Applied TF-IDF and n-gram modeling, storing indexed data in MongoDB for retrieval
- Developed classification logic for matching queries to relevant cases
- Created API to enable search operations and integration with frontend

TriStrike - Real-Time Betting Game

Feb 2025 - April 2025

College Project

Tech Stack: Node.js (Express.js), JavaScript, WebSockets, Docker, MySQL SPA Architecture

- Developed a real-time lotto-style betting game using Vanilla JavaScript, Node.js, and WebSockets
- Built a Single Page Application (SPA) with dynamic UI updates without full page reloads
- Designed a token-based authentication system over WebSocket connections for secure user sessions
- Deployed a Dockerized architecture with master-slave MySQL replication for high availability and data redundancy

Khloris - Flower shop

Aug 2024 - Nov 2024

College Project

Tech Stack: PHP, MySQL, HTML, CSS

- Designed and developed the UX and UI for a responsive flower shop website
- Focused on creating an intuitive user experience and a visually appealing interface
- Utilized Git for version control, collaborated with team members, and maintained an organized codebase

The Wall - Social Media Platform

Sept 2024 - Nov 2024

College Project

Tech Stack: MySQL, HTML, CSS, JavaScript, Node.js, API development

- Led the team by assigning tasks and guiding development efforts
- Organized the database using MySQL and applied normalization for efficiency
- Developed a REST API to handle notifications and improve real-time updates
- Developed and connected the backend with the frontend for integration
- Built a responsive Single Page Application (SPA) using JavaScript and Node.js
- Enhanced the frontend using the Vanilla JS framework

EDUCATION

Bachelor of Science in Computer Science

2022 - 2026

- College of Mary Immaculate, Poblacion, Pandi, Bulacan

CERTIFICATION

Certificate of Completion - Successfully completing 240 hours of **JCAS Logistic's** Computer Science Internship Program "Project DevStart"

Claude Code in Action - Anthropic Education

Completed: April 2026

Credential URL:

<https://verify.skilljar.com/c/4k4ym9rdcuty>
